Competency Results

Business Finance Apply theories for financial planning, capital structuring and budgeting

FINA 4040
FinGame

Comprehensive Analysis

Competency: Apply theories of financial planning, portfolio simulation, capital structuring and budgeting.

FINA 4040 (FinGame)

- The outcome for this competency has been successfully reached during the last years with a fail in Spring 2017.
- Considering the results, it is recommended to emphasize the discussion of cost of capital, both theoretically and practically.

CPC, Learning Outcome and competency

CPC: Finance / Business Finance

Learning Outcome: Students will apply quantitative analysis techniques to solve business problems.

Competency: Apply theories of forecasting, planning and control techniques to solve business problems.

Instrument and course

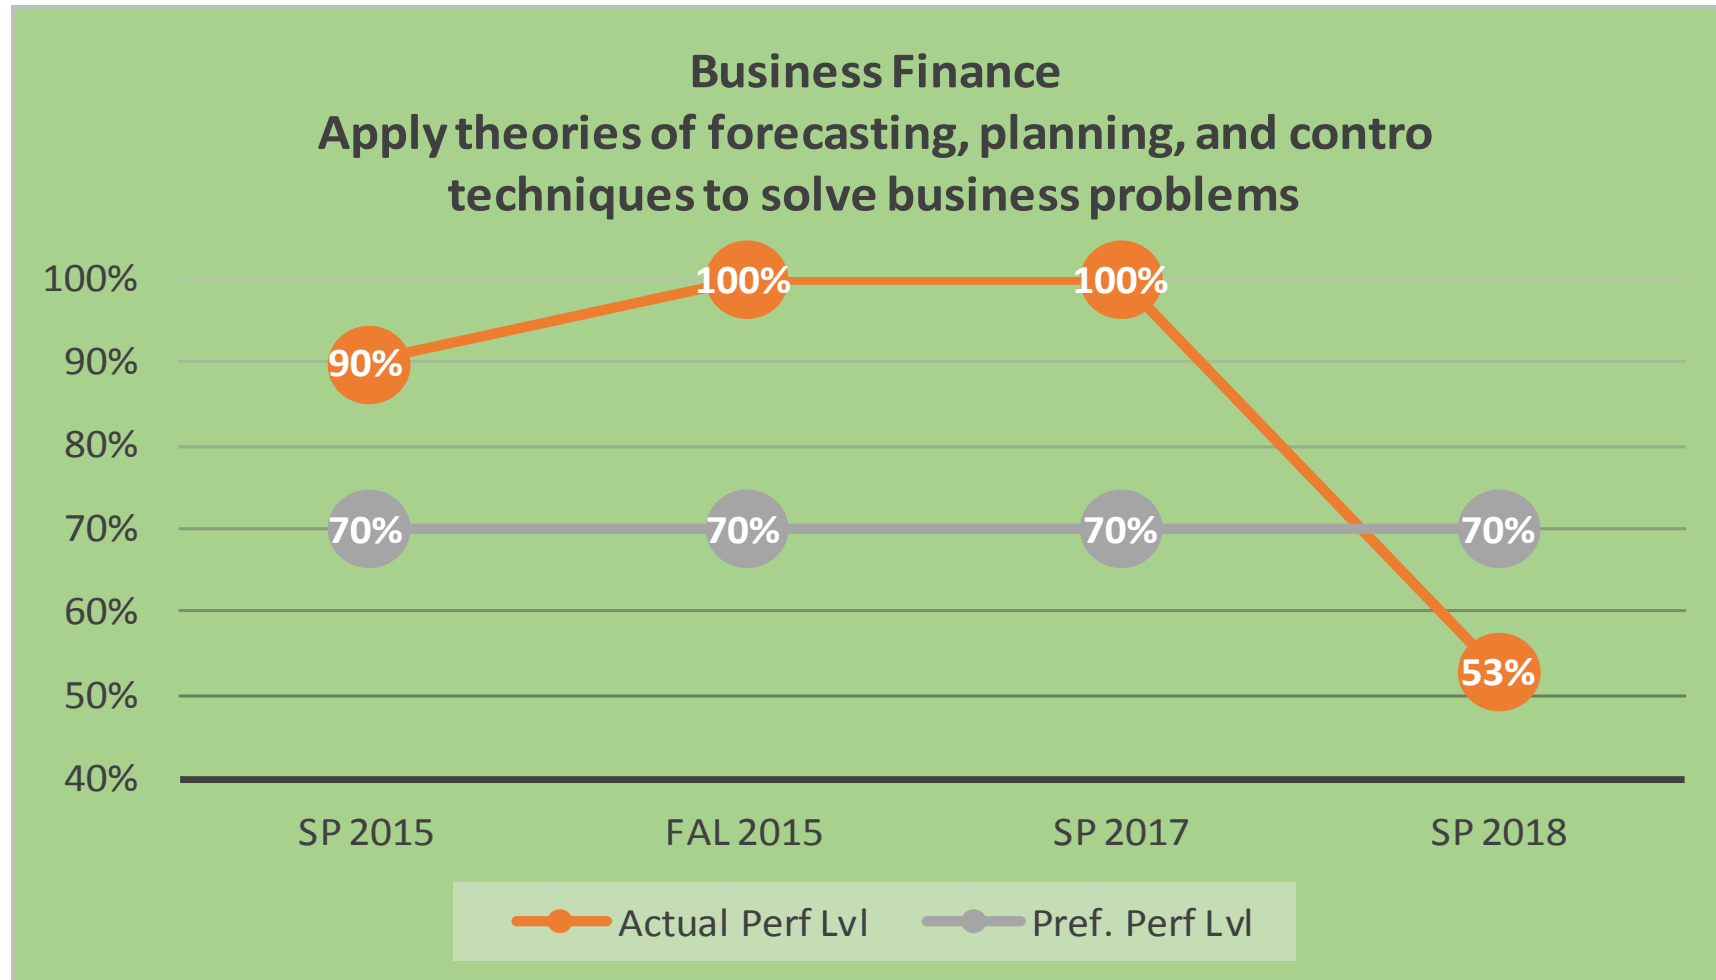

Instrument: Course embedded simulation (FinGame); direct summative; external (FINA 4040)

Competency Results

FINA 4040 FinGame

Comprehensive Analysis

Competency: Apply theories of forecasting, planning and control techniques to solve business problems.

FINA 4040

- Students fail to achieve the required level in spring 2018 after e consecutive successful periods
- Following what has been done in previous semester, an overview of concepts discussed in previous courses was given to students, particularly on the areas of cost of capital and cash flow estimation.
- The main reasons to justify this non-compliance is based on students failing to follow basic instructions to complete the report.

Recommendations

- Keep providing hands-on exercise and the review before starting the simulation to guarantee successful
