Air Force ROTC (AFROTC) is a college program designed to train and develop cadets for a commission as an officer in the United States Air Force or US Space Force. In AFROTC, you will primarily be a student, dedicated to earning your degree. Simultaneously, as an ROTC cadet, you will undergo training to cultivate the leadership skills essential for becoming an Air Force officer.

Our cadets prioritize their role as students, striving for academic excellence. They actively participate in classes and training sessions, where they refine their leadership and management abilities. Upon fulfilling both academic degree requirements and AFROTC obligations, you will receive a commission as a Second Lieutenant in the United States.

INTEGRITY • SERVICE • EXCELLENCE

# REQUIREMENTS

---

In order to join and participate in the program, you will need to meet and maintain the following qualifications:

- U.S. CITIZENSHIP
- MAINTAIN REQUIRED GPA STANDARDS. 2.5 FOR SCHOLARSHIP CADETS / 2.0 FOR ALL OTHERS

# HOW DOES IT WORK?

## CADET-STUDENT LIFE

1

As an AFROTC cadet, you have the flexibility to pursue a degree of your choice, be it in engineering or music. Your college life is similar to that of other students. You'll attend the same classes and participate in the same college activities. The difference is in the elective courses that you take and the physical training that's required of all cadets.

---

## OUR TRAINING

2

You will engage in physical training activities with fellow cadets and participate in a leadership laboratory. This unique setting equips you with the essential skills needed to emerge as a leader in both personal and military contexts. During the initial two years of the program, you function as a General Military Cadet (GMC) and undergo selection for Field Training in your sophomore year.

---

## FIELD TRAINING

3

Field Training, conducted annually at Maxwell Air Force Base, AL, serves as a platform to refine the skills acquired over the previous two years, allowing you to apply them in a simulated environment. Following the completion of Field Training, you will transition into the Professional Officer Corps (POC), where you will lead and train the GMC.

# BENEFITS

---

**SCHOLARSHIPS**

**PROFESSIONAL  
DEVELOPMENT**

**PHYSICAL  
TRAINING**

**BALANCED  
COLLEGE LIFE**

# CAREER OPPORTUNITIES

Almost every career that exists in the civilian world is also found in the Air Force. Students earning technical and science degrees fill our greatest needs and therefore, are among the most sought after.

While others may struggle in the civilian job market after graduation, through AFROTC you can pursue a career in professions such as:

|                      |                        |                   |                        |
|----------------------|------------------------|-------------------|------------------------|
| ACQUISITIONS         | INTELLIGENCE           | PILOT             | PUBLIC AFFAIRS         |
| AIRCRAFT MAINTENANCE | LOGISTICS              | CIVIL ENGINEERING | MECHANICAL ENGINEERING |
| SPACE OPERATIONS     | ELECTRICAL ENGINEERING | SPECIAL WARFARE   | COMBAT SYSTEM OFFICER  |
