Promoting I&E Skills Through an Interdisciplinary Curriculum: Moving Forward Precision Agriculture and Economic Improvement in Puerto Rico

Food Innovation Hub

A hand is shown wearing a white, 3D-printed sleeve with a complex, lattice-like structure. The sleeve is made of a material that appears to be a combination of plastic and fabric, with a mesh-like pattern of interconnected lines. The hand is positioned at the left end of the sleeve, and the sleeve extends towards the right. The background is a plain, light-colored surface.
