Code Your Way To
The Stars

Attention Puerto Rico!

Chances are that today's High School students will be among the first explorers to land on Mars. Want to see if you have what it takes to code our way to the stars? Apply to Code Quest, an annual competition where teams of High School students around the world use JAVA, Python, and/or VB.net programming to solve 15-20 problems. Competitions will take place around the world on Saturday, April 27, including in Aguadilla, Puerto Rico.

Know a high school computer science program that might be interested in attending? Feel free to spread the word! In the meantime, send any questions to codequest-puertorico.gr-ebs@lmco.com
