

CIIC 4151 - Senior Design Project

1. General Information:

Alpha-numeric codification: CIIC 4151
Course Title: Senior Design Project
Number of credits: 3
Contact Period: 3 hours per week

2. Course Description:

English: Team project to design, implement, test, and document a system based on Computer Systems and Computer Architecture techniques, incorporating computer science standards, engineering standards and problem constraints.

Spanish: Proyecto en equipo para diseñar, implementar, probar, y documentar un sistema que conlleve el uso de técnicas de Sistemas Computación y Arquitecturas de Computadora, incorporando estándares de Computación, Ingeniería, y restricciones del problema.

3. Pre/Co-requisites and other requirements:

(CIIC 4025 and CIIC 4060 and INSO 4101) or Authorization from department chair

4. Course Objectives:

Students will work in teams to design, implement, test, and document a software system that solves a real-world problem using techniques for Computer Systems and Computer Architecture. The student should demonstrate his/her capability to apply previous knowledge to formulate, model and solve a real computer science and engineering problem.

5. Instructional Strategies:

- conference discussion computation laboratory
- seminar with formal presentation seminar without formal presentation workshop
- art workshop practice trip thesis special problems tutoring
- research other, please specify:

6. Minimum or Required Resources Available:

Students will use the Departmental computer laboratories to complete course projects.

7. Course time frame and thematic outline

Outline	Contact Hours
Introduction and project proposal preparation	6
Seminars on topics such as: - Product specification - Budgeting - Ethics - IDE Tools - Environmental and social issues related to the Engineering Practice - Project Management - Any other as the design projects dictate	10
Design of software system and progress reports	26
Oral presentation of project report	3
Total hours: (equivalent to contact period)	45
