Open-Ended Comments/Suggestions:

1. (FAC) We should add something related to our graduates being makers/employers (not only employees).
2. (FAC) I concur with #2 and #3, but not with #1. I would prefer PEO #1 with a statement such as: "Our graduates will meet the expectations of their clients, while maintaining sound engineering and ethical principles."
3. (STU) I'm from the surveying program. I agree with the PEO's stated above, however I find that the execution isn't up to par with the UPR's standards.
4. (STU) I believe that the program is too long, we have to take classes that we really don't need in daily basis or in our profession. The program should be reviewed.
