

University of Puerto Rico Mayagüez Campus College of Engineering Department of Mechanical Engineering M.S./Ph.D. in Mechanical Engineering

Course Syllabus

1. General Information:

Alpha-numeric codification: INME 6001 Course Title: Advanced Thermodynamics I Number of credits: 3 Contact Period: Three hours of lecture per week

2. Course Description:

English: Critical study of thermodynamic laws; property relationships; statistical thermodynamics. Thermodynamics design of power plants and refrigeration plants.

Spanish: Estudio crítico de la termodinámica, relaciones entre propiedades; termodinámica estadística. Diseño termodinámico para plantas de potencia y ciclo de refrigeración.

3. Pre/Co-requisites and other requirements:

Prerequisites: Authorization of the Director of the Department.

4. Course Objectives:

- Describing exergy and recognizing the exergy balance relation;
- Applying exergy analysis of a thermodynamic system;
- Retrieving the thermodynamic properties using the Maxwell relations;
- Describing different equations of state and evaluate their applicability to specific problems.

5. Instructional Strategies:

Sconference discussion computation laboratory

seminar with formal presentation seminar without formal presentation workshop

art workshop practice trip thesis special problems tutoring

□research □other, please specify:

6. Minimum or Required Resources Available: None

7.	7. Course time frame and thematic outline			
	General Topics	Contact Hours		
	Basic relation and the first law	6		
	The second law of thermodynamics	6		
	Exergy analysis of closed system, control volume, and cycles	12		
	Equation of state	3		
	Thermodynamic property relations and properties of homogeneous	12		
	mixtures			
	Statistical thermodynamics	6		
	Total hours: (equivalent to contact period)	45		

8. Grading System

Quantifiable (letters) Not Quantifiable

9. Evaluation Strategies

	Quantity	Percent
🖂 Exams	1-2	50
🔀 Final Exam	1	25
Short Quizzes		
Oral Reports		
Monographies		
Portfolio		
Projects	1	25
Journals		
Other, specify:		
ТО	DTAL:	100%

10. Bibliography:

Textbook:

• Bejan, A., (2006) Advanced Engineering Thermodynamics, Wiley, New York, NY. (**)

Other References:

- Tahir-Kheli, R., (2012) General and Statistical Thermodynamics. Springer, Berlin, Germany.
- Annamalai, K. and Ishwar K.P., (2001) Advanced Thermodynamics Engineering. CRC Press, Boca Raton, FL. (**)
- Carey, V.P., (1999) Statistical Thermodynamics and Microscale Thermophysics, Cambridge University Press, Cambridge, UK.
- ** These books are key classic references and remain as the top books for the subjects covered in the course and there are no up-to-date textbooks to substitute these books.

11. Law 51: The Comprehensive Educational Services Act for People with Disabilities: States that after identifying with the instructor and the institution, the student with disabilities will receive reasonable accommodation in their courses and evaluations. For more information, contact the Department of Counseling and Psychological services at the Office of the Dean of

Students (Office DE 21) or call 787-265-3864 or 787-832-4040 x 3772, 2040 and 3864.

12. Academic Integrity

The University of Puerto Rico promotes the highest standards of academic and scientific integrity. Article 6.2 of the UPR Students General Bylaws (Board of Trustees Certification 13, 2009-2010) states that academic dishonesty includes, but is not limited to: fraudulent actions; obtaining grades or academic degrees by false or fraudulent simulations; copying the whole or part of the academic work of another person; plagiarizing totally or partially the work of another person; copying all or part of another person answers to the questions of an oral or written exam by taking or getting someone else to take the exam on his/her behalf; as well as enabling and facilitating another person to perform the aforementioned behavior. Any of these behaviors will be subject to disciplinary action in accordance with the disciplinary procedure laid down in the UPR Students General Bylaws.—

13. Certification 06-43 of the Academic Senate

"The academic guidelines for offering online courses," defines: Traditional face-to-face courses are those that have less than 25% of the course's regular contact hours via the Internet. Therefore, a three-credit course will be considered "face to face" if, of the 45 hours of regular contact, 11 or less are taught via the Internet. According to certification 06-43 of the Academic Senate, a course may include up to 25% of its total contact hours via the Internet. The objective of this is so that all professors have this alternative in the case of any unscheduled eventuality.

14. Sexual Harassment: Certification 130-2014-2015 states:

Sexual harassment in the workplace and in the study environment is an illegal and discriminatory act and is against the best interests of the University of Puerto Rico. All persons who understand they have been subject to acts of sexual harassment at the University of Puerto Rico may file a complaint and request that the institution investigate, where necessary, and assume the corresponding action by the university authorities. If the complainant is a student, he or she must refer his or her complaint to the Office of the Student Ombudsperson or that of the Dean of Students.

Revised: February, 2019
