National Institute of Standards and Technology

NIST SURF Program

Student Applicant Information

To be filled out by student applicant and included with completed institutional application **DO NOT SEND SEPARATELY – note this is for the Gaithersburg program**

Name		Institution				
En	nail address					
Qu	iickest contact ((cell, apt/dorm phone)				
Ho	ome Address					
Cu	rrent Class Sta	anding (check only o	one)			
	Freshman	Sophomore	Junior	Senior	5 th Year Senior	
Ap		aithersburg SURF below for further inform		ease Note: indicate 1	and 2 nd choices)	
	<u>CNST</u>	EL		MML/NCNR Materials Science Chemical/Bioch Sciences		
Major (Minor)Current Overall GPA						
Do	you require ho			er) Male Femal bedroom with one other	e (for housing purposes only)	
Av	If no, give	availability dates Limited	number of 9-week fo	3/2011 – 8/5/2011) ellowships available (6/6	5/2011 – 8/5/2011)	
NOTE: All students must attend through the final week in August Are you a U.S. Citizen?YES orNO						
	-			nt with a valid Green	Card? YES or NO	
Ch	ecklist:					
	Resume Two letters of recommendation Transcripts (unofficial copies acceptable) Personal statement of commitment to participate and <u>description of prioritized research interests</u> Verification of U.S. citizenship or permanent legal residence, (e.g. copy of birth certificate, passport, or green card)					
Q.,.	Submit to University contact for inclusion with institutional application. DO NOT SEND SEDADATELY					

Submit to University contact for inclusion with institutional application – <u>DO NOT SEND SEPARATELY</u>

APPLICATION DEADLINE: February 15

Application Questions: Anita Sweigert, Phone: 301-975-4200, Fax: 301-975-3038 Website: http://www.nist.gov/surfgaithersburg

NOTE: This form contains collection of information requirements subject to the Paperwork Reduction Act. Notwithstanding any other provision of the law, no person is required to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB control number. The estimated response time for this application is 2 hours. The response time includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. OMB NO:: 0693-0042 Exp.Date: 10/31/2012

SURFING CNST – The Center for Nanoscale Science and Technology

Projects support nanotechnology from discovery to production by providing industry, academia, NIST, and other government agencies with access to world-class nanoscale measurement and fabrication methods and technology. Primary focus areas are: future electronics; nanofabrication and nanomanufacturing; and energy storage, transport, and conversion

Range of Research Activities: nanofabrication, atomic-scale characterization & manipulation, nanophotonics, nanomagnetics, nanoplasmonics, environmental TEM, nanoelectromechanical systems, thermoelectrics & photovoltaics, theory of nanostructures, and nanoscale control; <u>additional information...</u>

Relevant Academic Majors: physical sciences, engineering, materials science, physics, chemistry, biochemistry, mathematics, computer science

Selection Rate* (summer 2010): 30 applicants, 9 fellowships awarded (30%)

SURFING EL – Engineering Laboratory

Projects promote the development and dissemination of advanced manufacturing and construction technologies, guidelines, and services to the U.S. manufacturing and construction industries

Range of Research Activities: innovative fire protection, sustainable manufacturing; model-based engineering enterprise; intelligent manufacturing (automation, robotics, and equipment); net zero energy buildings; integrated and automated construction processes; building materials and systems; economic impacts; and disaster-resilient structures and communities; additional information...

Relevant Academic Majors: engineering including fire science, materials science, physics, chemistry, mathematics, statistics, computer science, and economics

Selection Rate* (summer 2010): 54 applicants, 22 fellowships awarded (41%)

SURFING ITL – Information Technology Laboratory

Projects provide hands-on experience in Applied Mathematics, Statistics, Software Testing, Computer Security, Information Access and Networking.

Range of Research Activities: human computer interaction, computer network modeling, pervasive computing, multimedia computing, information security, biometrics for computer access and security, cryptography, computer forensics, trustworthy software, software measurement science, software quality testing, digital data retrieval and preservation, bioinformatics, mathematical modeling, and image analysis; additional information...

Relevant Academic Majors: computer science, mathematics, statistics

Selection Rate* (summer 2010): 50 applicants, 17 fellowships awarded (34%)

SURFING MML/NCNR – Material Measurement Laboratory/NIST Center for Neutron Research Applicants can choose from two SURF concentrations:

<u>Materials Science</u> – Projects focus on synthesis, measurements, and computational/theory/modeling of innovative materials and devices

Range of Research Activities: ceramics, metallurgy, polymers, condensed matter science, biomaterials, semiconductors, metals, nanoscale materials and measurements (includes activities at the NCNR)

Relevant Academic Majors: materials science, chemistry, biochemistry, physics, physical sciences, mathematics, computer science, engineering, biological sciences

Selection Rate* (summer 2010): 53 applicants, 29 fellowships awarded (55 %)

<u>Chemical and Biochemical Sciences</u> – Projects address the nation's needs for measurements, standards, technology development, and reference data in the areas broadly encompassed by chemistry, biotechnology, and chemical engineering.

Range of Research Activities: from fundamental work in the composition, structure, properties, and processes of chemical, biological, environmental, and nanomaterials to the development and dissemination of certified reference materials, critically evaluated data, and advanced chemical and biochemical measurement paradigms

Relevant Academic Majors: chemistry, biochemistry, molecular biology, chemical engineering, computer science, environmental science, and to a lesser extent materials science, physics, mathematics, and other areas of engineering Selection Rate* (summer 2010): 87 applicants, 16 fellowships awarded (18 %)

additional information...

SURFING PML – Physical Measurement Laboratory

Projects provide hands-on research experience in electrotechnology and atomic, molecular, optical, radiation and chemical physics. Projects involve developing new electronic devices and metrology techniques to serve US industry's need for standardized measurements.

Range of Research Activities: atomic and molecular spectroscopy, atoms and molecules on surfaces, atomic and molecular collisions, environmental radioactivity, industrial radiation dosimetry, laser cooling and trapping, optical/infrared detector development, optical tweezers, physics of radiation therapy, quantum optics, QED effects on atomic structure, UV optics. Also cross-disciplinary electronics such as bioelectronics, power electronics, national electrical standards and smart grid metrology, micro- and nanotechnology, quantum-based electrical measurements and devices, electronics reliability, electronic materials metrology, molecular electronics, organic electronics, micro- and nanoelectronic fabrication; additional information...

Relevant Academic Majors: biochemistry, chemistry, computer science, electrical engineering, material science, mathematics, nanoscience, and physics

Selection Rate* (summer 2010): 113 applicants, 38 fellowships awarded (34%)

^{*}The historical acceptance rate for the SURF Gaithersburg program is 33% (i.e., for every three student applicants, one student gets accepted). The number of student applicants each year will impact these statistics. Each Laboratory lists the acceptance rate for the students that applied to that laboratory as their 1st choice. Students may be considered by other Laboratories for projects, thus giving students more opportunities to receive an internship.
