

## MASTER OF PROFESSIONAL STUDIES IN DAIRY PRODUCTS TECHNOLOGY

[mpsdairy.calpoly.edu](http://mpsdairy.calpoly.edu)

*California Polytechnic State University* is proud to introduce the nation's first Master of Professional Studies in Dairy Products Technology. This progressive one-year program builds on Cal Poly's Learn-by-Doing tradition to fulfill a growing industry need for effective managers in dairy processing. We are seeking specific individuals with backgrounds in engineering, physical science, military leadership, manufacturing, and related industries where leaders, critical thinkers, and technicians are made. Our program objective is to mold and shape students with these dynamic character traits into tomorrow's great leaders in dairy products manufacturing.

This professional, accelerated program will include intensive course work in an active team environment. You will work in a cohort of students over the course of twelve months, gaining valuable experience in an industry-based externship during your final quarter. The MPS degree will provide you with the necessary technical and management skills sought after by a wide range of industry employers. Secure your future in this ever growing industry with an MPS in Dairy Products Technology.
