

Kayaking Trip 1

Typical intermediate-length trip (4.3 mi): Magueyes Island to Phosphorescent Bay and return. Depending on the weather conditions, the starting time at night (or day), and the physical condition of the participants, the kayak routes could be short, intermediate, or long. Each trip is different and variable. The leaders will make the decision on the destination based on the factors mentioned. Note: This trip is usually made at night.

Kayaking Trip 2

Typical longer-length trip (6.9 mi): Magueyes Island around Isla Cueva, returning through “los canales”. Depending on the weather conditions, the starting time at night (or day), and the physical condition of the participants, the kayak routes could be short, intermediate, or long. Each trip is different and variable. The leaders will make the decision on the destination based on the factors mentioned. Note: This trip is usually made at night.

Kayaking Trip 4

Typical VERY LONG LENGTH trip (11.3 mi) for one outing. This trip is for those kayakers in EXCELLENT condition (by request only among kayakers who have taken previous trips with Campus Verde and who have done well on shorter trips): Magueyes Island to through “Canales” to Marumbo Canal (a canal 2.1 km long) and return to Magueyes Island. The leaders will make the final decision on the group based on weather, the strengths of the group, and the starting time. Note: This trip can be made during the day or night.
